

Epina

Epidural Catheter SET

ACE MEDICAL Epidural SET EPINA, The Best Choice of Your PERFECTION

EPINA has the best components for Epidural nerve block and it provides the user's convenience and patient's safety.

Spring-Wired Side holes Catheter

Ace Medical Epidural Catheter has spring-wire inside the catheter to help Catheter's smooth insertion into Epidural Space. The exact Catheter insertion site can be found easily by C-Arm due to Radiopaque applied Catheter. Through Side Hole and End Hole of Epidural Catheter, fast delivery of medicine is possible at the same time.

Hustead Type Epidural Needle

Unique bevel of Ace Medical Epidural Needle minimizes the injury incurred by puncture and the damage of dural fiber by Epidural catheter insertion.

Inserted length can be easily checked due to the Distance Index on Needle Body.

Comfortable finger grip owing to the attached handling wing makes easy puncture.

Detachable Stylet prevents the mixing of foreign substances into the Needle.

High-Quality Epidural Filter & Connection Adaptor

Epidural filter of Lure Lock Type blocks effectively the invasion of microbes into Epidural Space due to the reliable anti-bacterial work.

New concept of one touch adaptor makes easy use with one-hand.
